PREFACE TO THE EIGHTH EDITION

Long a classic in its field, the Shepherd Atlas was out of print for many years, but remained in constant demand. Since the plates, originally made in Germany, were destroyed, this edition was printed by offset lithography. A special supplementary section of historical maps for the period since 1929 was prepared for the new edition by C. S. Hammond & Company.

In his preface to the Seventh Edition, 1929, the author expressed appreciation to Professor Charles H. Haskins, Harvard University; Professor Charles M. Andrews, Yale University; his colleagues, Professors Austin P. Evans, William Linn Westermann and Harry J. Carman, Columbia University; Mr. Harry W. Martin, Horace Mann Boy's School, New York; Dr. Isaiah Bowman and Mr. W. L. G. Joerg, the American Geographical Society; Principal C. Grant Robertson, Birmingham University; Honorary Professor T. F. Tout, Manchester University; Mr. L. Cecil Jane, Aberystwyth Collège, University of Wales; and the officials of the Library of the British Museum, in particular Mr. F. D. Sladen, Superintendent of the Reading Room.

For suggestions helpful in the preparation of the Eighth Edition, the publisher wishes to thank Mr. James M. Darley, Chief Cartographer of the National Geographic Society; Professor Walther Kirchner, University of Delaware; Professor John A. Krout, Vice President and Provost, Columbia University; Professor Bert Jaimes Loewenberg, Sarah Lawrence College; Professor Thomas C. Mendenhall, Yale University; Professor Marshall Smelser, University of Notre Dame.

INDEX

UNLESS otherwise indicated, the names given are those of towns. The Index does not furnish a complete set of references to the more important countries at successive periods of time. The maps needful for this purpose may be found by consulting the Table of Contents.

Modern names of ancient localities and different spellings of the same name are sometimes inclosed in parentheses, sometimes noted by cross-references. Though not appearing on the maps themselves, a considerable number of classical and medieval Latin names, and of different spellings of the same name, have been inserted in the Index with the proper cross-reference to the modern or customary form of such names.

If not accompanied by the letters B. C., the dates cited are A. D.

The number following a name refers to the page on which the name appears. The capital letter or letters following this number usually refer to a strip on that page inclosed by lines of longitude, and the small letter or letters, to a strip inclosed by lines of latitude. The name itself lies within the block formed by the intersection of the two strips. Thus the name *Madrid* 83 K g will be found on page 83, within the block formed by the intersection of the strip lettered K and the strip lettered g. In some cases, however, the letter or letters refer to a particular plan or inset on the page concerned.

Names which appear in the original Index without indication of the block in which they lie, are repeated with full information in the Index-Supplement. Names contained in the maps for the period 1911-1929 also appear in the Index-Supplement, as well as a number of names for the old maps which were omitted in the original Index.
